piano, keyboard  
snowboarding  
drawing  
languages

## projects

2016

### Flappy Bird

-Currently building a clone of the "Flappy Bird" game on HTML5 Canvas.

2015

### CryptoVeil

-Built a chrome extension on the MEAN stack that helps Gmail users share sensitive data.

-From co-developing RESTful routes, managing authentication and authorization, and using browser events via Gmail.js, learned about DOM manipulation and the browser in particular.

-Available at Chrome web store <http://bit.ly/1QrbBzP>

2015

### Mean-Microgreens

-Built a single-page, e-commerce application on the MEAN stack where users can create their own blends of microgreens.

-From co-designing database models, API endpoints to developing core user interfaces (cart), engaged in the full stack development.

-Deployed at <http://bit.ly/21H2JgA>

## experience

2015 Sept–

### Patron

New York, NY

*Frontend developer*

-Develop user interface of web product and landing page (patron.gallery), shipping core features regularly in an agile team environment.

-Use HTML/CSS(Sass), AngularJS, Gulp, Heroku, and cross-browser compatible, responsive design techniques.

2016 Feb–

### Namely

New York, NY

*Developer Consultant, Freelance*

-Work closely with marketing team to implement effective A/B testing.

-Develop user interface of the marketing site to optimize web conversion rate.

## education
